Professional Summary

Software Engineer with experience building scalable backend applications, enterprise HRMS solutions, and AI-powered systems using Python, FastAPI, Django, Angular, PostgreSQL, Docker, and Amazon Web Services (AWS). Experienced in REST API development, cloud deployments, enterprise software implementation, workflow automation, and Generative AI applications. Passionate about designing secure, maintainable, and production-ready software solutions while translating complex business requirements into scalable technical implementations.

Technical Skills

Programming Languages: Python, SQL, JavaScript, TypeScript, C, HTML5, CSS3

Backend Development: FastAPI, Django, REST API Development, API Integration, Microservices, Asynchronous Programming

Frontend Development: Angular, Responsive Web Development

Artificial Intelligence & Machine Learning: Generative AI, Large Language Models (LLMs), Prompt Engineering, Natural Language Processing (NLP), Computer Vision, Scikit-learn, Pandas, NumPy, OpenCV, NLTK

Databases: PostgreSQL, MySQL, Database Design, SQL Query Optimization

Cloud & DevOps: Amazon Web Services (AWS), Google Cloud Platform (GCP), Docker, Kubernetes, Nginx, Git, GitHub

Enterprise Platforms: Darwinbox HRMS, Workflow Automation, Business Process Configuration, Data Migration, Webhook Integration

Professional Experience

MainStay People Consulting Pvt. Ltd.

Delivery Consultant

New Delhi, India

Feb 2026 – Present

- Configure and implement enterprise Darwinbox HRMS solutions by translating client business requirements into scalable workflow configurations and system logic.
- Collaborate with cross-functional stakeholders to analyze business processes, configure platform modules, and support successful enterprise software implementations.
- Perform data migration mapping, and workflow automation while ensuring solution accuracy and compliance with client requirements.
- Troubleshoot functional and technical configuration issues, validate system behavior, and support production deployments across multiple enterprise projects.

Simple Solution

Full Stack Developer Intern

New Delhi, India

Jan 2025 – Jan 2026

- Designed and developed a multi-tenant full-stack web application using Angular, FastAPI, and PostgreSQL, delivering scalable REST APIs and responsive user interfaces.
- Containerized application services using Docker and deployed workloads on Amazon Web Services (AWS) EC2, improving deployment consistency and application scalability.
- Implemented asynchronous background processing using AWS Lambda and AWS Step Functions, reducing cloud compute costs by approximately 35%.
- Configured Nginx as a reverse proxy and load balancer to improve request routing, enhance application security, and reduce response latency by approximately 22%.
- Collaborated with the development team to integrate frontend and backend components while maintaining clean API communication and database consistency.

- Developed web scraping pipelines to collect structured commercial product data from multiple online sources.
- Built Python-based data preprocessing workflows using Pandas and NumPy to clean, transform, and validate datasets, improving overall data quality by approximately 92%.
- Prepared structured datasets for downstream analytics and machine learning workflows by handling missing values, duplicate records, and inconsistent data formats.

Projects

GenAI Customer Service Bot | *Python, Gemini AI, Ollama, Streamlit*

- Developed a multi-model AI-powered customer support chatbot using Gemini AI and Ollama to generate context-aware responses through an interactive Streamlit interface.
- Implemented prompt engineering techniques and conversation context management to improve response relevance and user experience.
- Designed a modular architecture supporting multiple Large Language Models (LLMs), enabling easy integration of additional AI models.

Image Comparison & Analysis Tool | *Python, OpenCV, Scikit-learn, Gradio*

- Built a computer vision application to compare image similarity using Histogram Comparison, GLCM Texture Analysis, and ORB Feature Matching.
- Developed an interactive Gradio dashboard for real-time visualization of similarity scores and structural image differences.
- Optimized image processing workflows to provide fast and accurate similarity analysis for multiple image inputs.

Real-Time NLP Text Classification Pipeline | *Python, Scikit-learn, NLP, Streamlit*

- Built an NLP-based text classification system using TF-IDF feature extraction and Scikit-learn for real-time text prediction.
- Trained and evaluated the model, achieving 97.1% classification accuracy with a precision score of 1.0.
- Integrated the trained model into a Streamlit application to provide an interactive interface for live text classification.

Personalized Movie Recommendation System | *Python, Scikit-learn, Streamlit*

- Developed a content-based recommendation system using cosine similarity to recommend personalized movies based on user preferences.
- Built a Streamlit web application that allows users to search movies and receive real-time recommendations.
- Applied machine learning techniques to improve recommendation relevance and overall user experience.

Certifications

Darwinbox Academy: Certified Practitioner, Talent Acquisition Specialist, Talent Management Specialist, Time Management Specialist, Expense Management Specialist

Cloud & Artificial Intelligence: Microsoft Azure AI Fundamentals (AI-900), Google Cloud Big Data & Machine Learning Fundamentals, IBM AI Agent Architect

Data Analytics: Deloitte Australia Data Analytics Job Simulation, Deloitte Australia Cyber Security Job Simulation, Power BI Essentials, Introduction to Tableau, Business Analytics Foundation (PhysicsWallah)

Education

Bhagwan Parshuram Institute of Technology
Bachelor of Technology (B.Tech.) in Artificial Intelligence & Data Science — CGPA: 8.62/10.0

New Delhi, India
2022 – 2026

Kendriya Vidyalaya No. 3 Delhi Cantt
Class XII (CBSE) – Science with Computer Science — Percentage: 86.6%

2021

Kendriya Vidyalaya No. 3 Delhi Cantt
Class X (CBSE) — Percentage: 92.2%

2021
