## Professional Summary

Highly analytical B.Tech Software Engineer specializing in Artificial Intelligence, distributed cloud infrastructure, and core data systems. Proven track record designing, building, and deploying scalable full-stack web applications, microservices, and specialized generative AI pipelines. Combines strong engineering execution across FastAPI, Angular, and AWS with certified enterprise SaaS delivery consulting experience, enabling the effective translation of complex workflows into high-performance, automated software systems.

## Technical Skills

- **Languages:** Python, JavaScript, TypeScript, SQL, HTML/CSS, C Core.
- **Frameworks & Libraries:** FastAPI, Django, Angular, Scikit-Learn, Pandas, NumPy, OpenCV, NLTK.
- **Cloud & DevOps Architecture:** Amazon Web Services (AWS), Google Cloud Platform (GCP), Docker, Kubernetes, Nginx, Git/GitHub.
- **Data Engineering & AI/ML:** Generative AI (LLMs), Natural Language Processing (NLP), Computer Vision, Model Training, Core Data Analysis.
- **Databases & Enterprise Tools:** PostgreSQL, MySQL, Darwinbox Configurator Engine, Workflow Automation.

## Experience

### MainStay People Consulting Pvt.

New Delhi

*Delivery Consultant*

*Feb 2026 – Present*

- Serve as the primary technical delivery consultant managing the migration, functional deployment, and architectural workflow optimization of enterprise Darwinbox HRMS platforms for corporate organizations.
- Perform detailed technical alignment evaluations of complex legacy enterprise architectures to design custom business logic rules, improving client delivery speed and platform operational efficiency.
- Partner directly with cross-functional client engineering teams to resolve data model discrepancies, map API properties, and deploy automated workflow integration solutions.

### Simple Solution

New Delhi

*Full Stack Developer Intern*

*Jan 2025 – Jan 2026*

- Designed and engineered a secure multi-tenant full-stack web application, constructing a responsive user single-page interface with **Angular** and a high-performance RESTful API layer via **FastAPI** and **PostgreSQL**.
- Containerized application microservices using **Docker** and orchestrated zero-downtime production deployments onto **Amazon Web Services (AWS)** EC2 clusters to guarantee scalable infrastructure availability.
- Engineered serverless asynchronous background task computing workflows utilizing **AWS Lambda** and **AWS Step Functions**, minimizing baseline computing runtime resource costs by 35%.
- Configured **Nginx** as a reverse proxy and API gateway load balancer, setting up custom SSL termination protocols and decreasing global application service response latency metrics by 22%.

### CantiLever

Remote

*Data Science Intern*

*Aug 2024 – Sep 2024*

- Built and deployed an automated web-scraping extraction network to systematically collect commercial product dataset information across multiple target web platforms.
- Developed clean data preprocessing script components using Python, Pandas, and NumPy to filter missing values, handle statistical anomalies, and improve data pipeline structural accuracy by 92%.

# Projects

**GenAI Customer Service Bot**

Python, Gemini AI, Ollama3, Streamlit

- Engineered a multi-model conversational AI agent using **Gemini AI**, Ollama3, and Google PaLM architectures to dynamically handle complex client queries with context retention.
- Optimized pipeline model inference latencies and implemented custom prompt mitigation guidelines to enforce secure, contextually aligned generative AI responses.

**Image Comparison & Analysis Tool**

Python, OpenCV, Scikit-Learn, Gradio

- Developed a computer vision diagnostic framework application to analyze, process, and map structural image similarity index values using Histogram, Texture (GLCM), and ORB Keypoint matching.
- Deployed a functional real-time dashboard interface via **Gradio**, allowing operators to immediately render structural similarity tracking comparative matrices.

**Personalized Movie Recommender System**

Python, Machine Learning, Streamlit

- Designed a personalized content recommendation engine utilizing machine learning vector metrics to predict the top 5 match listings based on historical preference data logs.

**Spam Email Detection System**

Python, NLP, Scikit-Learn, Text Classification

- Trained and optimized an NLP text classification model on high-volume string sets, achieving a verified **97.1% accuracy** rating and a perfect precision score metric of 1.0 via Scikit-Learn.

# Education

|                                                             |                        |
|-------------------------------------------------------------|------------------------|
| ○ <b>B.Tech in Artificial Intelligence and Data Science</b> | 2022 – 2026            |
| Bhagwan Parshuram Institute Of Technology, New Delhi        | <b>CGPA: 8.62/10.0</b> |
| ○ <b>Class XII (CBSE) - Science &amp; Computer Science</b>  | 2021                   |

| Kendriya Vidyalaya No.3, Delhi Cantt                        | <b>92.2%</b>           |

# Certifications

- **Enterprise SaaS Platform Credentials:** Official Darwinbox Certified Practitioner – MainStay People Consulting Pvt.
- **Cloud Systems & Artificial Intelligence:** Google Cloud Big Data & ML Fundamentals • Microsoft Azure AI Fundamentals (AI-900) • IBM AI Agent Architect.
- **Data Visualization & Analytics Labs:** Power BI Essentials • Introduction to Tableau • Business Analytics Foundation | PhysicsWallah • Deloitte Australia Data Analytics Simulation • Deloitte Australia Cyber Security Simulation.
